COLLETTORI CON VALVOLE A SFERA

Manifolds with ball valves

Serie NINO

Collettori "NINO" con attacchi 1/2"x16 e valvola a sfera.

Manifold "NINO" with connections 1/2"x16 and ball valve.

I collettori di distribuzione "NINO" sono generalmente utilizzati nelle reti di distribuzione di acqua calda e fredda. Grazie alla loro configurazione permettono l'alimentazione in parallelo delle utenze per acqua calda e/o fredda riducendo al minimo le perdite di carico. I collettori sono prodotti in conformità alle normative in materia e sono certificati relativamente alla composizione chimica dei materiali impiegati ed a livello dimensionale.

The distribution manifolds "NINO" are typically used for hot and cold water distribution.

Due to the configuration they may be used to distribute cold/hot water in parallel reducing at minimum the pressure drop.

The manifolds are produced according to the relevant rules and are certified for material chemical composition and dimensional request.
